EMPOWERING 50,000+ CREATORS AND ENTERPRISES

GLOBALTECH STACKINC LUMINA COREFLOW

Unmatched Performance

Everything You Need to Go Global

Our advanced toolset handles the complex work so you can focus on storytelling.

AI Transcription
Harness state-of-the-art neural networks to transcribe speech in over 95 languages with industry-leading accuracy.

Instant Translation
Reach a global audience with one click. Automatically translate your subtitles into 120+ languages while preserving tone.

Advanced Export
Export in SRT, VTT, or TXT. Even burn-in subtitles directly into your video with custom font styling.

Your Workflow, Optimized.

From raw footage to fully captioned media in four simple steps.

1 **Upload Your Content**
Drag and drop any video format. We support MP4, MOV, and AVI up to 2GB.

2 **AI Auto-Transcription**
Our engines process the audio track and generate perfectly timed text blocks.

3 **Sync & Refine**
Fine-tune the results in our frame-synchronized subtitle editor.

Ready to subtitle your first video?

Join the future of content production today. Your first 10 minutes are on us.

Start	End	Text
00:00	00:04	Welcome to the annual tech summit keynote.
00:04	00:09	Playing — Today we are exploring the future of generative AI in workspace automation.
00:09	00:15	The landscape in this region is uniquely defined by its shifting mists.
00:15	00:22	As we delve deeper into the data, several key trends emerge.
00:22	00:28	First, the democratization of creative tools is accelerating at an unprecedented pace.
00:28	00:35	Users no longer need complex technical knowledge to produce high-quality media.
00:35	00:42	This shift is empowering small teams and independent creators worldwide.

Finalize & Export

Choose your preferred format and language to download your refined subtitles.

STEP 1
Select Export Format

Different platforms require specific subtitle file types.

- **SubRip** .srt — Most common format, widely supported by players and social media.
- **WebVTT** .vtt — Standard format for web-based video players (HTML5).
- **Plain Text** .txt — Simple text file without timestamps, great for transcripts.

STEP 2
Refine Settings

Export Language: English (Original)
✓ Verified for accuracy by AutoSub AI

☑ **Include Timestamps** — Required for video synchronization.
☐ **Add UTF-8 BOM** — Helpful for legacy Windows text editors.

Project Summary

File Name	Product_Demo_Q4_Final.mp4
Video Length	04:22
Total Segments	148 Lines

File Preview
